

How to "Un-Hide" Slide

The image shows a screenshot of the Microsoft PowerPoint interface with the Slide Show tab selected. The interface is in Slide Sorter view, displaying a grid of slide thumbnails. Four red callout boxes with white text and arrows provide instructions:

- 1. Select "Slide Sorter" option**: An arrow points to the Slide Sorter icon in the bottom right corner of the PowerPoint window.
- 2. Click on Slide to "unhide"**: An arrow points to slide 6, which is currently hidden (indicated by a grey background).
- 3. Select Tab "Slide Show"**: An arrow points to the Slide Show tab in the top ribbon.
- 4. Click on option "Hide Slide"**: An arrow points to the Hide Slide icon in the Slide Show tab ribbon.

The slide thumbnails visible include:

- Slide 1: Title slide
- Slide 2: Today's Path
- Slide 3: Road Map
- Slide 4: DISC Model (partially visible)
- Slide 5: What is DISC? (includes a door image and text: "Gets on, quickly pushes button for 'Close Door' - Dominant", "Keeps door open & says, 'You'll wait for you!' - Influence", "Lets others in first, then moves toward corner - Steady", "Checks maximum weight & then takes stairs - Conscientious")
- Slide 6: History (includes a photo of a man and a book titled "EMOTIONS OF NORMAL PEOPLE")
- Slide 7: DISC Model (includes a 2x2 matrix with D, I, C, S quadrants)
- Slide 8: (partially visible)
- Slide 9: Part Two
- Slide 10: Natural Styles
- Slide 11: (partially visible)
- Slide 12: (partially visible)
- Slide 13: Dominant
